Kishan Kumar Sharma

FLUTTER DEVELOPER (EXPERIENCE : 4 YEARS)

Profile

Experienced Flutter Developer at ATPL, skilled in Flutter, Dart, PHP, MySQL, Python, and Node.js. Expert in designing high-performance mobile and web applications, with strong UI/UX design and troubleshooting abilities. Committed to driving innovative projects and business growth through tech trend updates.

Work Experience

Software engineer -Flutter Developer, Anandpushp Technologies Pvt ltd, Kolkata

NOVEMBER 2021 — PRESENT

In my current role at ATPL, I develop high-performance mobile applications for both Android and iOS using Flutter and Dart. I am responsible for designing interactive UIs, integrating APIs, and managing state with GETX and Provider. Additionally, I deploy and test applications, and use Firebase for real-time updates and crash analytics.

Software Engineer - Flutter developer, Aseztak wholesale Online Private Limited, Siliguri

FEBRUARY 2021 — NOVEMBER 2021

My role at Aseztak Wholesale Online Pvt. Ltd., I develop high-performance mobile applications for both Android and iOS using Flutter and Dart. I design interactive UIs, integrate APIs, manage state with GETX, and handle deployment and testing. Additionally, I utilize Firebase for real-time updates and crash analytics, and develop APIs using FastAPI.

Software Engineer, TechIons, Siliguri

SEPTEMBER 2020 — DECEMBER 2020

My role at TechIons, I develop high-performance mobile applications for both Android and iOS using React Native. I design interactive UIs, integrate APIs, manage state with REDUX and handle deployment and testing. Additionally, I utilize Firebase for real-time updates and crash analytics, and develop APIs using Laravel.

Software Engineer (Intern), Mus Technology Pvt. Ltd, Siliguri

JANUARY 2024 — AUGUST 2024

My role at Mus Technologies Pvt. Ltd., I develop high-performance web applications using HTML, CSS (including Bootstrap), and JavaScript for the frontend, and Laravel for the backend. I design interactive UIs, integrate APIs, and handle deployment and testing.

Education

Key Features :

- User Authentication and Authorization
- Product Catalog Management
- Search and Filtering
- Customizable Pricing and Discounts
- Order Management
- Inventory Management
- Payment Gateway Integration
- Messaging and Communication
- Customizable Dashboards and Analytics
- Responsive Design
- Push Notifications
- Scalability and Performance Optimization
- Feedback and Review System

Technology Stack :

- Flutter
- Dart
- Python (FastApi)
- MySql
- Firebase

3. E-Commerce (Android & Ios) : React Native

SEPTEMBER 2020 — DECEMBER 2024

Emporium E-commerce App Overview:

Emporium is an e-commerce app built with React Native (front-end), Laravel (back-end), and Firebase (real-time data and authentication).

Key Features:

- User Authentication
- Product Catalog
- Shopping Cart and Checkout
- Order Management
- User Profile
- Notifications
- Admin Panel
- Analytics

Technology Stack:

- React Native
- Laravel
- MySQL
- Firebase

Minor Projects

1. Realtime Chat Application (Android & Ios)

Real-time Chat App:

Built with Flutter and Dart, powered by Firebase for seamless messaging experiences. Offers instant communication, real-time message updates.

GitHub link : Chat Application

2. Audio Player (Android & Ios)

Audio Recorder and Player App:

Developed with Flutter, providing users with an intuitive interface to record high-quality audio and play back recordings effortlessly. Features include easy file management, playback controls, and seamless integration for a smooth audio experience.

GitHub project link : Audio-recorder-and-player

3. AI CHAT-BOT (Android & Ios)

AI Chat Bot App:

Developed with Flutter and Dart, leveraging Google's Dialogflow for natural language processing, enabling intuitive and seamless conversational experiences. Harnesses the power of AI to understand user queries, provide real-time responses, and facilitate interactive dialogues, enhancing user engagement and satisfaction.

App Link : Chat Bot App

4. ARTBOX (AI TATOO GENERATOR)

ArtBox AI Tattoo Image Generator:

Built with Flutter and Dart, leveraging the OpenAI API to create unique tattoo designs. Offers users an innovative platform to generate personalized tattoo art through advanced AI capabilities.

App link : ArtBox

5. Task Management App (Android & Ios)

To-Do App:

Developed with Flutter and Firebase, featuring comprehensive task management and real-time synchronization. Integrated analytics provide insights into user behavior and app usage, enhancing productivity and user engagement

App Link : Todo-app

6. Quick Commerce (Android & Ios) Seller App & Buyers App, Ongoing

Quick Commerce Grocery Delivery App:

Built with Flutter and Firebase, facilitating seamless interactions between sellers and buyers. Offers real-time inventory management for sellers and swift, efficient grocery delivery for buyers, enhancing the shopping experience

Github link : Buyers-App

Github link : Sellers-App

My Personal Portfolio Website (React Js) Ongoing

Personal Portfolio App:

Crafted with React.js and deployed on AWS, showcasing professional achievements and projects with a sleek, interactive design. Provides a dynamic and responsive platform to highlight skills, experience, and portfolio pieces, ensuring high availability and performance.
